

ACTIVE-B12 **EIA**

the next level of B12 testing

Expert's Consensus Statement

An international expert group of key opinion leaders met in March 2012 to review the current practices of testing for Vitamin B12 deficiency.

The experts agreed that Active-B12 offers a more reliable assessment of Vitamin B12 status and as an output from the discussion a Consensus Statement was produced:

"Emerging evidence indicates that Active-B12 is a more reliable marker of B12 status than serum vitamin B12"

Any of the experts involved in this discussion group can be contacted for more information:

Prof. Wolfgang Herrmann
Department of Clinical Chemistry
and Laboratory Medicine, Saarland
University, Homburg/Saar, Germany

Jun. Prof. Dr. Rima Obeid
Department of Clinical Chemistry
and Laboratory Medicine, Saarland
University, Homburg/Saar, Germany

Prof. Ralph Green
Depts of Pathology & Laboratory
Medicine and Internal Medicine,
University of California, Davis, USA

Dr. Donald Jacobsen
